Languages

Spanish (Native)

English

Enthusiastic and proactive. I am fascinated by the web development and all related to IT. I am excited to learn other languages and expand my knowledge as a web developer. I would offer all my commitment and be a pleasant addition to your team.

Projects

2021 -2022 (current job)

- **RPA Site:** Internal web system build with Django to optimize and automate different workflows of Real Property associates (Real estate company). A web system to manage HR duties.

2021

- **tapiceriatraña.com:** Responsive landing page for an upholstery business.

2020

- **celularesnica.com:** A web platform for buying and selling smartphones. The platform allows local business to create an online store and publish ads through a catalogue of what they are offering to their clients. I developed the entire website with the MEAN stack and hosted the project in Digital Ocean in a VPS using Ubuntu OS.

2019

- **grekoostudio.com:** Designed and developed a landing page full responsive for a small business of publicity and advice in the process of getting a domain name and

Experience

Real Property associates

- Designed and developed a web app to automate and optimize reconciliations of accounting reports with Django and Pandas library.
- System administrator in Podio Platform. Optimizing apps to control different business workflows. Automating tasks and communication between the AppFolio system and the Podio platform.
- Structuring data to analyze business metric in real-time with graphics created in Klipfolio.
- Created an API REST with Django REST Framework and a front-end site with React to facilitate HR tasks between the Seattle office and the Nicaragua team.

Education

Computer engineering
2014 - 2019

National University of Engineering
UNI - Managua, Nicaragua
